

Coronavirus disease (COVID-19)

Bulletin N° 138/2020

From: POLO SERVIZI HEMOV
To: Saipem People

Place Milano, Italy
 Date 25th June 2020

Situation Update
 As of June 24th, 2020

The number of reported confirmed cases of COVID-19 has increased by 135 212 cases since yesterday, bringing the total number of globally reported cases to 9 129 146.

The total reported confirmed cases and the new cases per World Health Organization (WHO) regions are as below:

Globally	9 129 146 cases (135 212)	473 797 deaths (4 187)
Africa	239 548 cases (7 333)	5 290 deaths (173)
Americas	4 507 006 cases (68 785)	226 504 deaths (2 274)
Eastern Mediterranean	950 730 cases (17 678)	21 439 deaths (442)
Europe	2 581 602 cases (18 960)	194 530 deaths (736)
South-East Asia	641 148 cases (21 033)	18 663 deaths (544)
Western Pacific	208 371 cases (1 423)	7 358 deaths (18)

Note: The classification of countries per WHO regions is presented in the table below.

In most of the countries the restrictions are being slowly and partially removed. Check and follow the instructions of local government. Regardless that, remember that social distancing of 2 meters, frequent hands washing and wearing gloves combined with wearing the face mask are still strongly recommended if not compulsory.

NOTE: *The cases reported by Saipem Health Department are in line with the numbers reported by World Health Organization. For few countries, with the support of our local departments, data was updated according to local Ministries of Health or other official governmental institutions. In the event of a discrepancy between cases reported by us and cases reported by your respective country public health officials, data reported by countries Health Ministries should be considered the most up to date.*

Distribution of cases per countries is shown in below table:

Reporting Country/ Territory/Area	Total confirmed cases	Total confirmed new cases	Total deaths	Total new deaths	Transmission classification	Days since last reported case
Africa						
South Africa	106 108	4 518	2 102	111	Community transmission	0
Nigeria	21 371	452	533	8	Community transmission	0
Ghana	14 568	414	95	10	Community transmission	0
Algeria	12 076	156	861	9	Community transmission	0
Senegal	6 034	64	89	3	Community transmission	0
Mauritania	3 121	137	112	1	Clusters of cases	0
Congo	1 141	54	37	0	Community transmission	0
Equatorial Guinea	1 043	0	12	0	Community transmission	31

Terms:

- **No cases:** Countries/territories/areas with no confirmed cases (not shown in table)
- **Sporadic cases:** Countries/territories/areas with one or more cases, imported or locally detected
- **Clusters of cases:** Countries/territories/areas experiencing cases, clustered in time, geographic location and/or by common exposures
- **Community transmission:** Countries/area/territories experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to:
 - Large numbers of cases not linkable to transmission chains
 - Large numbers of cases from sentinel lab surveillance
 - Multiple unrelated clusters in several areas of the country/territory/area

Country, territory, or area-specific updates and errata

Italy: The negative number of deaths is due to data revision performed by Istituto Superiore di Sanità and confirmation that the cause of death is attributable exclusively to SARS-CoV-2

According to WHO classification of epidemics, the phase of COVID-19 epidemic is Phase 6: Pandemic phase: increased and sustained transmission in general population. WHO' s assessment of the risk of spread and risk of impact of COVID-19 is **“very high”** at the global level.

Follow local Health authorities' requirements and instructions; access Saipem Health materials to receive verified & up to date information, guidance and advice.

All Coronavirus COVID-19 related materials are available now on a dedicated page on Health Portal, at following link:

[http://hsesite.saipemnet.saipem.intranet/Health/Public%20Users/Coronavirus%20disease%20\(COVID-19\)/Pages/default.aspx](http://hsesite.saipemnet.saipem.intranet/Health/Public%20Users/Coronavirus%20disease%20(COVID-19)/Pages/default.aspx)

The basic principles to reduce the general risk of transmission of COVID-19 infection include the following:

- regularly and thoroughly wash your hands with soap and water or clean your hands with an alcohol-based hand rub
- maintain at least 1 meter (3 feet) distance between yourself and other persons
- avoid mass gatherings
- avoid close contact with people suffering from acute respiratory infections.
- avoid touching eyes, nose and mouth – to avoid transfer of the virus to your eyes, nose or mouth, from where the virus can enter your body
- travelers with symptoms of acute respiratory infection should practice cough etiquette (maintain distance, cover coughs and sneezes with disposable tissues or clothing, and wash hands) and visit medical doctor immediately.
- any person with symptoms of acute respiratory infection, similar to COVID, has to stay at home, cancel eventual travels (also to avoid possible problems at the airports) and seek medical advice from his/her family doctor, if in reasonable vicinity, Saipem medical team or through Pronto Dottore

The measures put in place are:

- Business trips are suspended until further notice
- All travel and transfers must be limited to the bare minimum and in any case subject to an assessment of the impossibility to manage the related task through audio or video conferences.
- Many countries are considered to be at high virus transmission risk and with an ongoing COVID-19 epidemic and local governments' health authorities are imposing a number of measures for incoming or outgoing travelers. This should be reflected in the specific Risk evaluation matrix
- Smart working, when possible, will be proposed for 14 days to all those who, or whose family members/dependents, come back from the above-mentioned countries.
- Those coming back from countries/areas with high virus transmission risk to their home country, upon any complain of fever, cough or breathing difficulties shall stay at home, and seek immediate medical advice
- Local Health Functions shall be in touch with the local national health authorities of each country where Saipem operates in order to be updated with their recommendations regarding COVID-19 and to implement these recommendations.
- The measures undertaken in Italy are placed on Intranet.
